

Aircalc Online Update – Quick Guide

1. **IMPORTANT!** We recommend to update your Windows version to Windows 10, for Windows 7 and 8 or older versions Aircalc won't be officially supported by the Windows operating system.
2. **IMPORTANT!** Before starting the installation we recommend to stop the antivirus / Anti malware
If the antivirus to avoid problems with the Aercalc software
In the APPENDIX A you'll find the link with instructions on how to disable the most common antivirus.

Summary

A. UPDATE	1
B. NEW INSTALL	4
C. FORCE THE INSTALLATION OF THE LAST UPDATE	7
D. TROUBLESHOOTING MAJOR KNOWN ISSUES	8

A. UPDATE

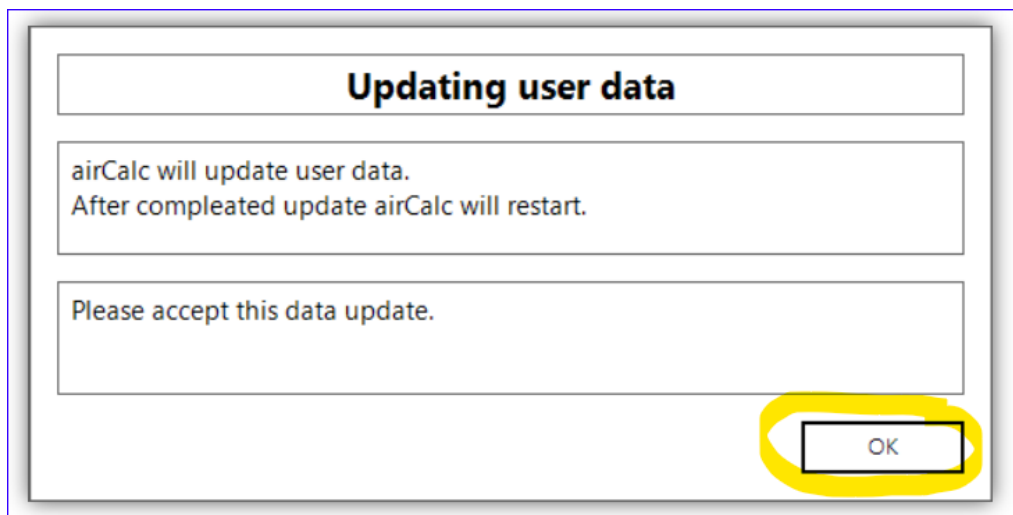

1. Please open Aircalc++ and make sure your PC connected to the internet > Double click on the icon

2. Login with your Login data > OK

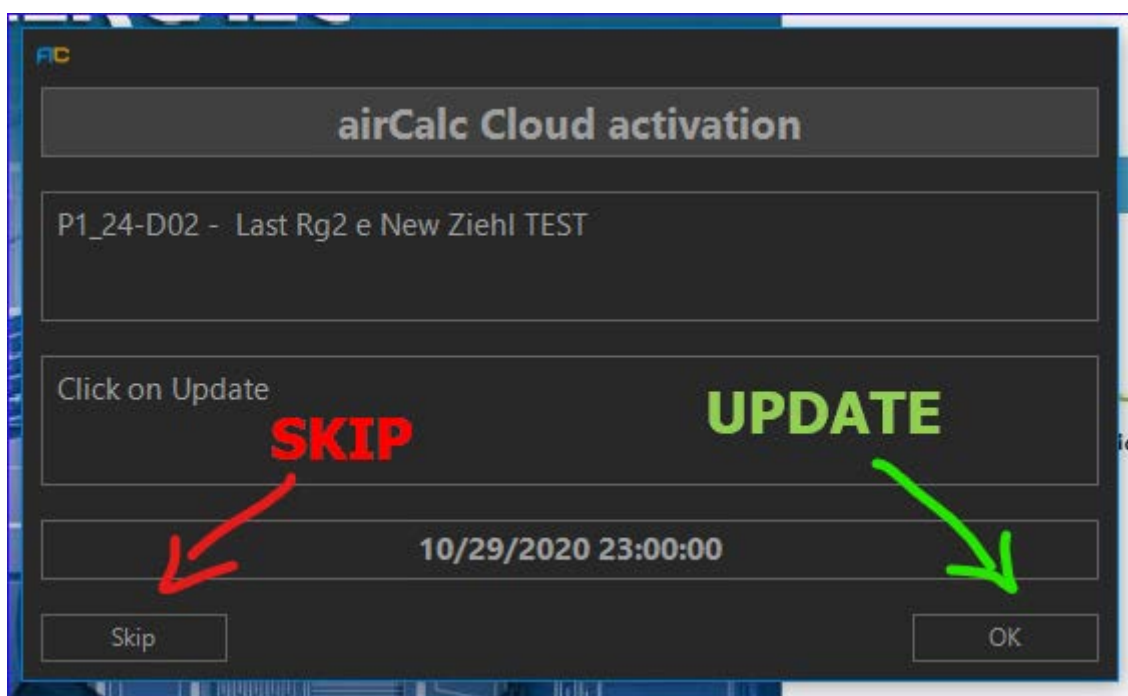

The image shows a 'Login' dialog box from the Aircalc++ software. The dialog has a teal header bar with the word 'Login' in white. The main area is light gray and contains several input fields: 'Main License' with the value '10041', 'Sub License' with the value '10002', 'User Name' with the value 'user', and 'Password' with masked characters '*****'. There is also a 'Language' dropdown menu currently set to 'english'. To the right of the license fields is a yellow key icon and a small gray button with three dots. At the bottom left, there is a checkbox labeled 'Save password' which is checked. At the bottom right, there are two buttons: 'OK' and 'Abort'.

3. In case the Updating user data window appears (see the picture below), accept the update (this is the only possible solution) > OK

The procedure will update the login data (name, address, email, telephone number, etc.) of your user and office; In case you need to change or add data, please let us know, the modifications will be available with the next update.

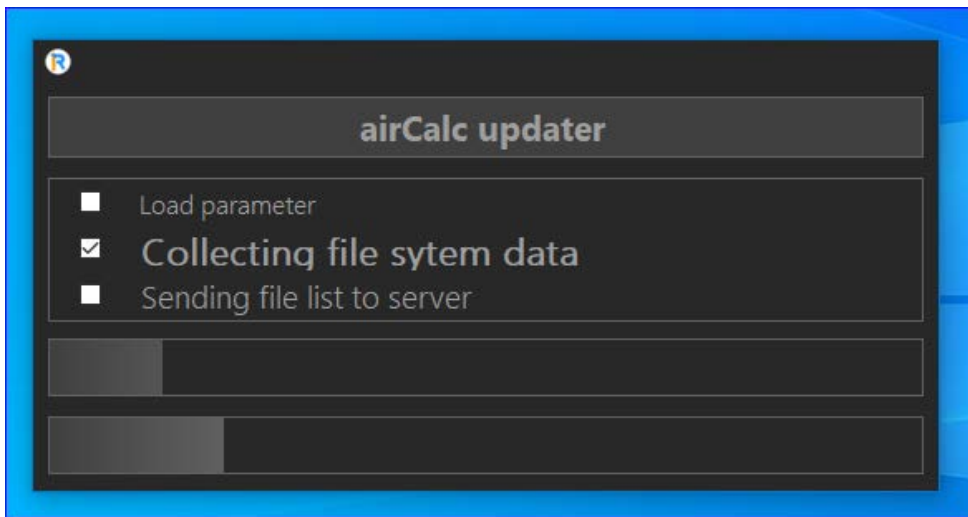

4. Please login again with your login data (or with the new one, in case you requested us to create a new user ID) > OK
5. For future Aercalc updates you'll see the following window, with the changelog name in the first field:

SKIP To postpone the update
 OK To install the update (recommended)

It will be possible to postpone the update only for a certain time. After that the only possible choice will be to execute the update with the button "OK".

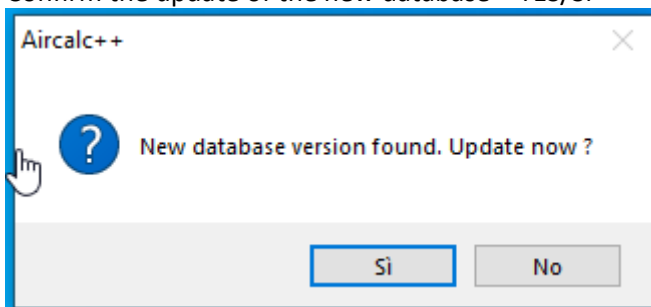

6. The updating procedure after confirming with "OK" starts with the automatic download of the new files and their installation (for minor updates the procedure will be very quick).

7. After the installation, confirm with Yes (Sì in Italian) on the window that automatically appears:

8. Login again > OK
9. Confirm the update of the new database > YES/Sì

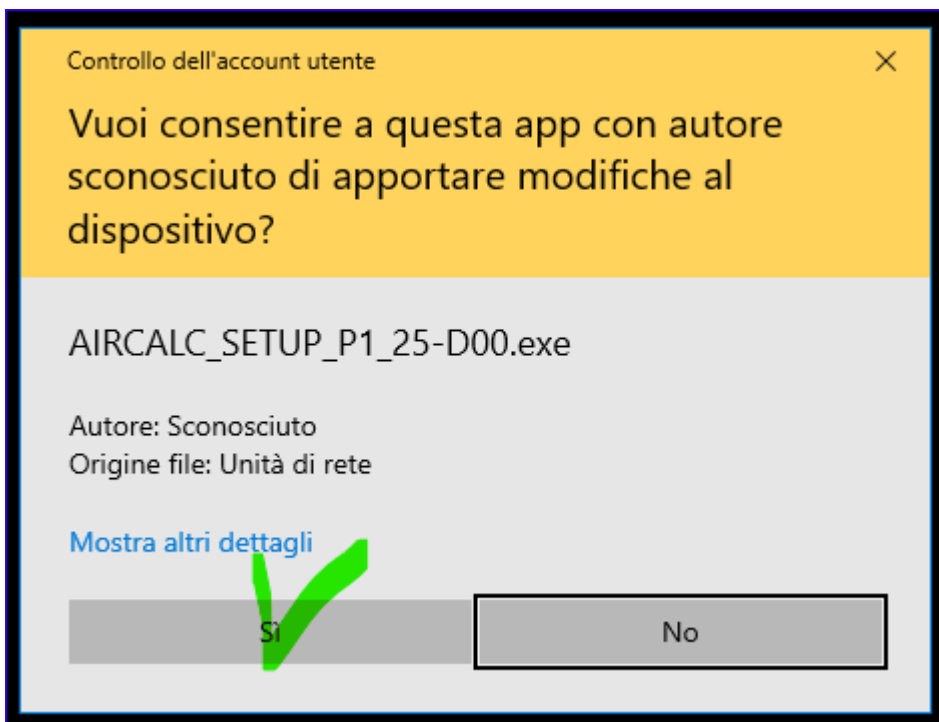

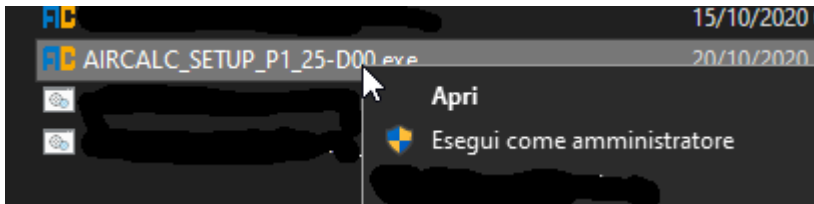

10. Login again > OK
11. COMPLETED – Your Aircalc is updated to the new available version

B. NEW INSTALL

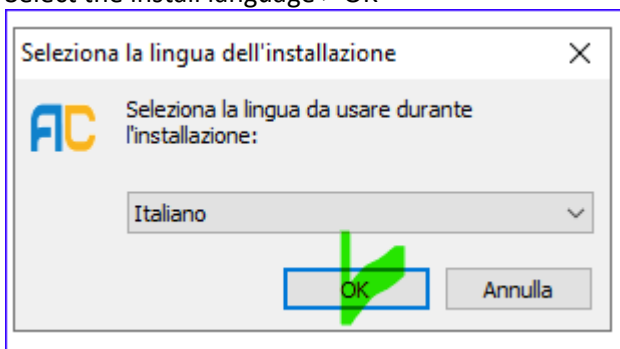

In case you are installing Aircalc for the first time on your device, the installation procedure remains the same as in previous versions.

1. Download installation files from the link received by email from your sales manager
2. Turn off antivirus/anti-malware as per Warnings at the beginning of the document
3. Start the installation as PC Administrator: Right-click the installation EXE file you just downloaded and click "Run as Administrator"

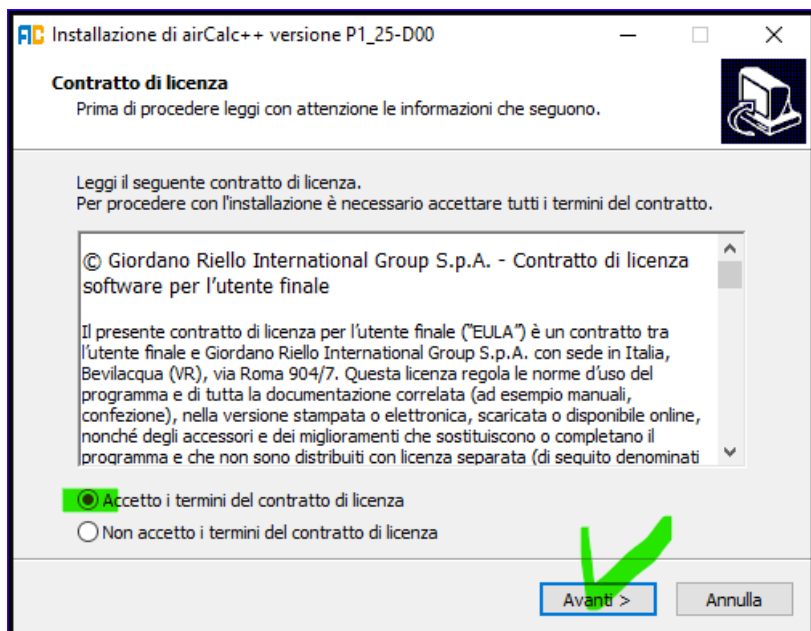

4. Proceed with the usual installation steps:

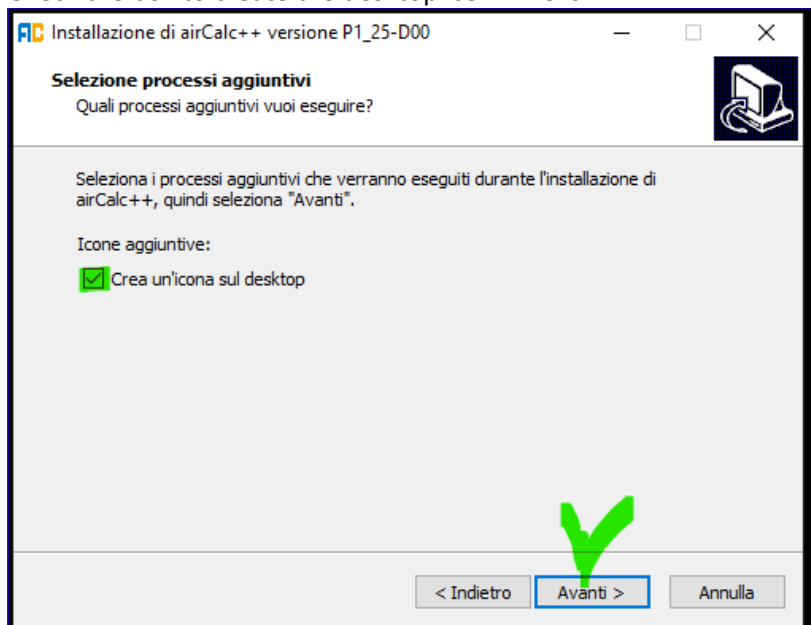

Select the install language > OK

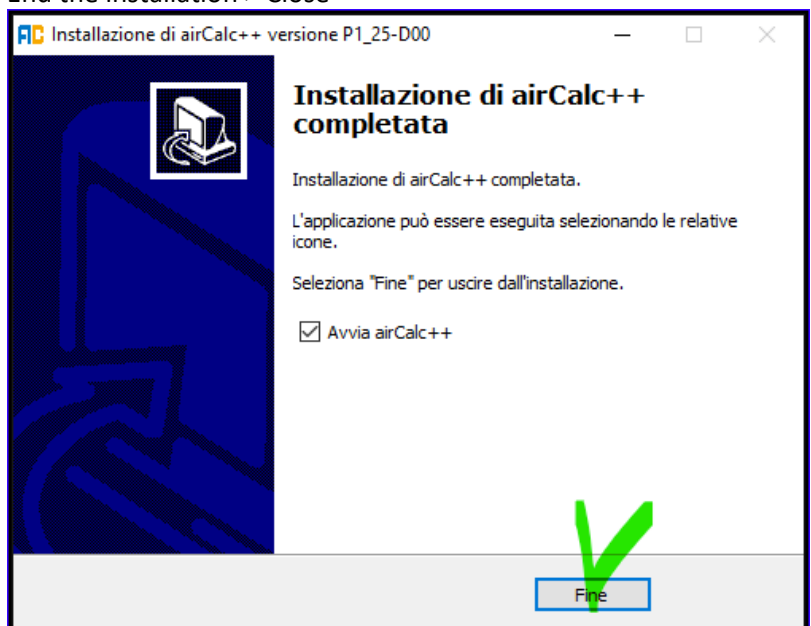

Sign the terms of the contract > Next

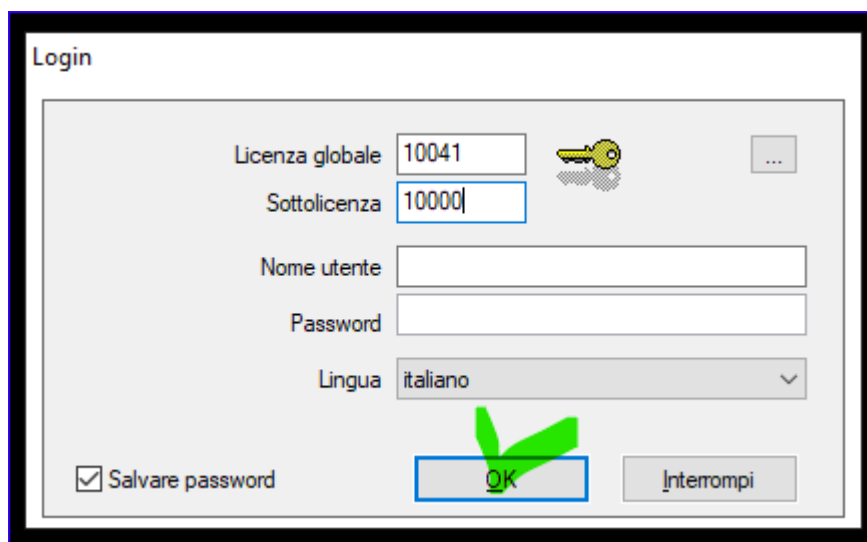

Check the box to create the desktop icon > Next

End the installation > Close

5. Start Aircalc for the first time with the login credentials you received by Email from your sales manager

The screenshot shows the 'Login' dialog box for Aircalc. It contains the following fields and controls:

- Licenza globale:** A text box containing '10041'.
- Sottolicensa:** A text box containing '10000'.
- Nome utente:** An empty text box.
- Password:** An empty text box.
- Lingua:** A dropdown menu currently set to 'italiano'.
- Salvare password:** A checked checkbox.
- Buttons:** 'OK' and 'Interrompi' buttons at the bottom right.

A yellow key icon is positioned to the right of the license fields. A large green checkmark is drawn over the 'OK' button.

6. **ATTENTION!** On the first start you will be asked to update your version to the latest available ONLINE!

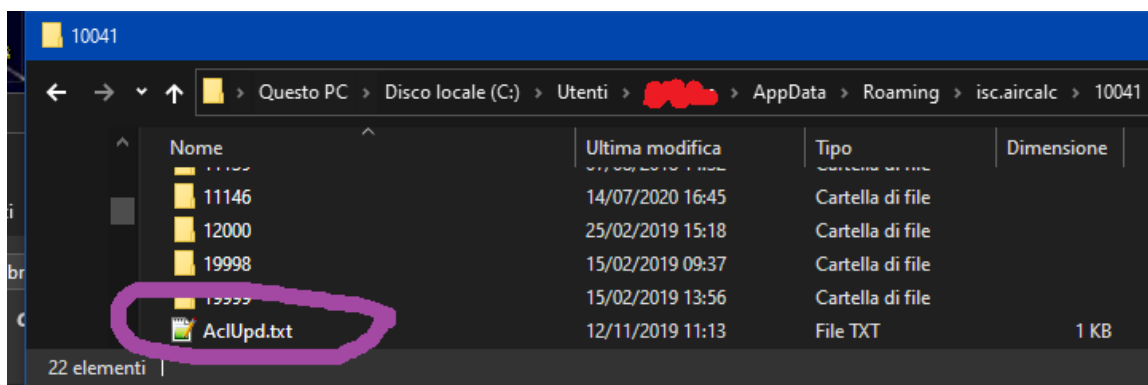

To update follow the instructions in the previous chapter

C. FORCE THE INSTALLATION OF THE LAST UPDATE

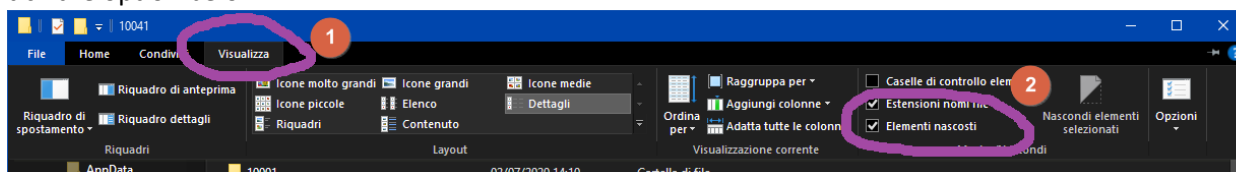

In some cases, for errors during the upgrade or only for reset your Aircalc installation, you may need to want to restore the latest available Aircalc update.

The procedure is very simple:

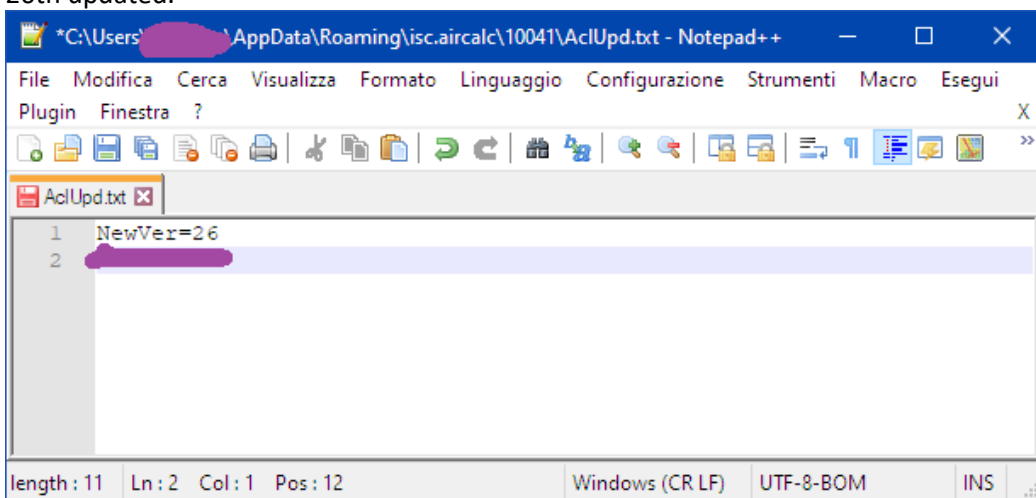

1. **Stop the antivirus / Anti malware!**
2. Close Aircalc if open
3. Go to the forlder “C:\Users\<PCUSER>\AppData\Roaming\isc.aircalc\10041” (where <PCUSER> is the name of the MS Windows User in use on your PC)

4. If you cannot access/view the "AppData" folder, you must enable the display of hidden files. To do this just tick the option below:

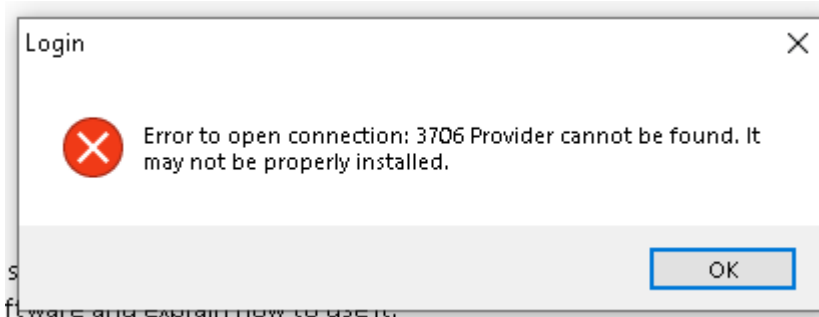

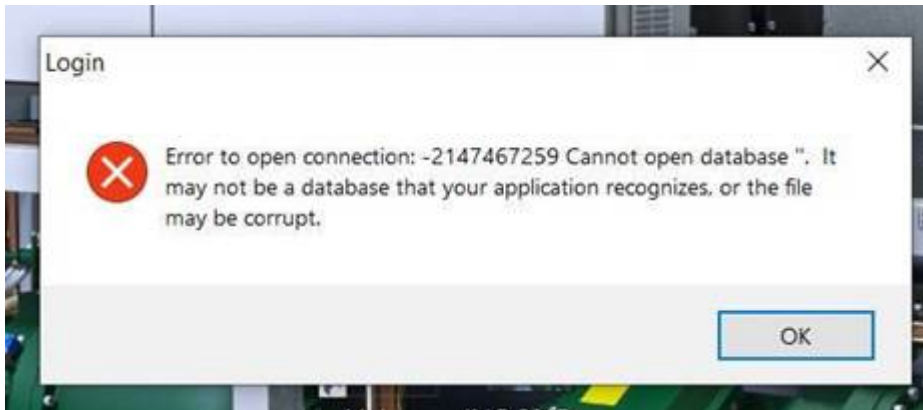

5. Open the file “AclUpd.txt” that contains the number of the latest Aircalc update: “NewVer=26” means the 26th updated.

6. To force the last update, you must set a number version less than the one in the file (For example, change NewVer=26 to NewVer=25) and save the TXT file.
7. On next opening of Aircalc the program will propose again the update.

D. TROUBLESHOOTING MAJOR KNOWN ISSUES

- “Error to open connection: Cannot open database” or “ ...: 3706 Provider cannot be found. It may not be properly installed”

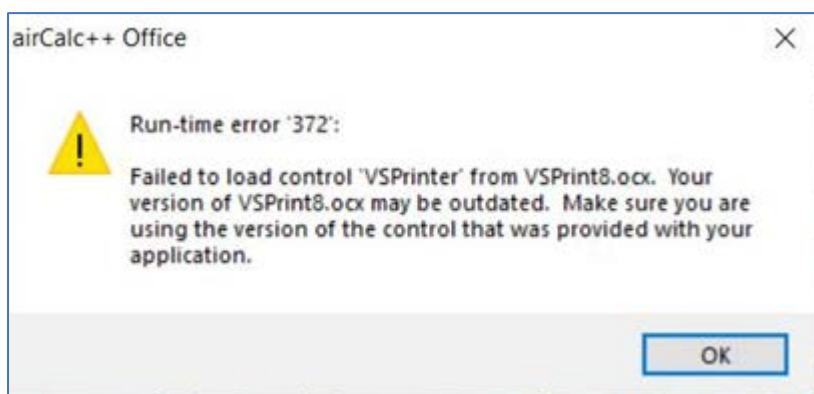

Solution:

Download and install the Microsoft access database from the link below:

<http://prg.fastaer.com/Tools/AccessDatabaseEngine2010.exe>

After open the Aircalc program whitout restart the PC.

- “Run-time error ‘372’”

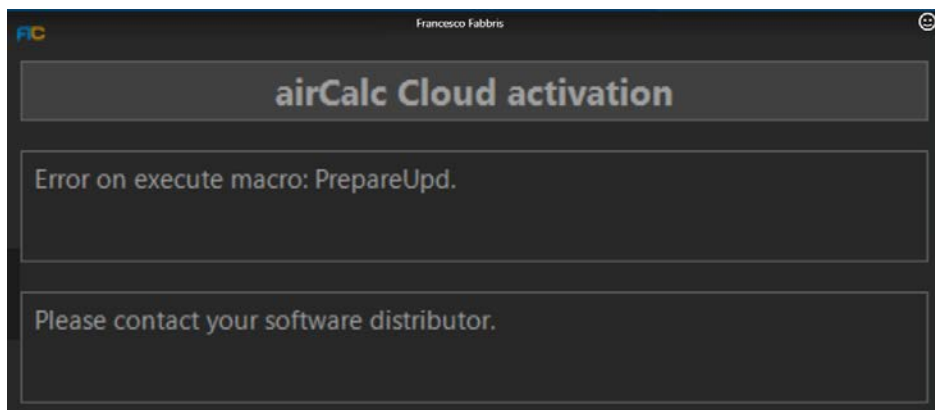

The first installation was performed on a protected folder (for example, on "Programs" or "Programs (x86)") or antivirus prevented the new installation files from being copied.

Solution:

Stop the Antivirus / Antimalware system and repeat the installation.

In last chance, contact your sales manager to get in touch with software technical support.

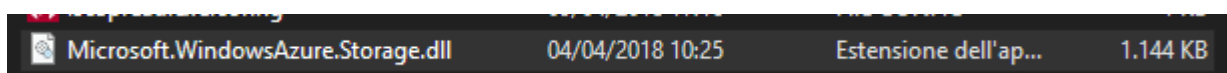

- “Error on execute macro: PrepareUpd.”

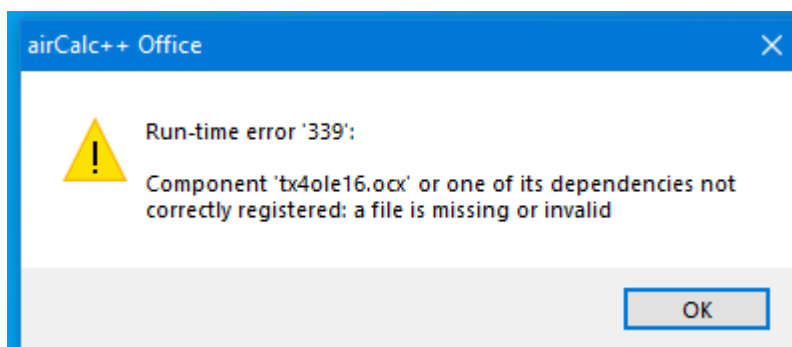

The error occurs in some cases on PC where has been installed non-complete versions of the Aircalc program for Testing or to cover particular problems.

Solution:

You must simply delete the file: "Microsoft.WindowsAzure.Storage.dll" in the folder "C:\configurator\aircalc2" and open again Aircalc and proceed with the usual upgrade.

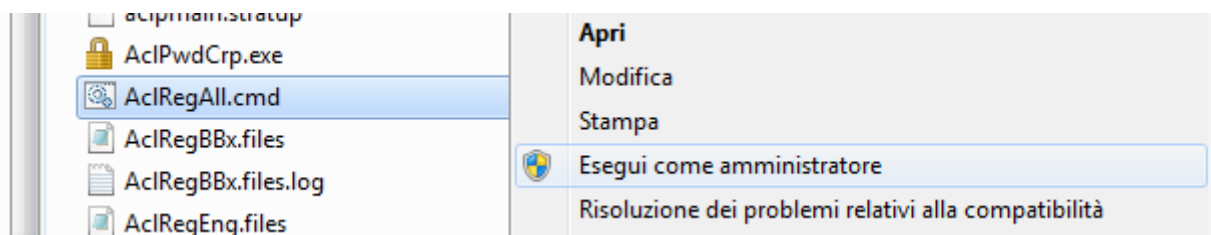

• Run-time error '339' – Component 'tx4ole16.ocx' ..."

The first installation was performed on a protected folder (for example, on "Programs" or "Programs (x86)") or antivirus prevented the new installation files from being copied.

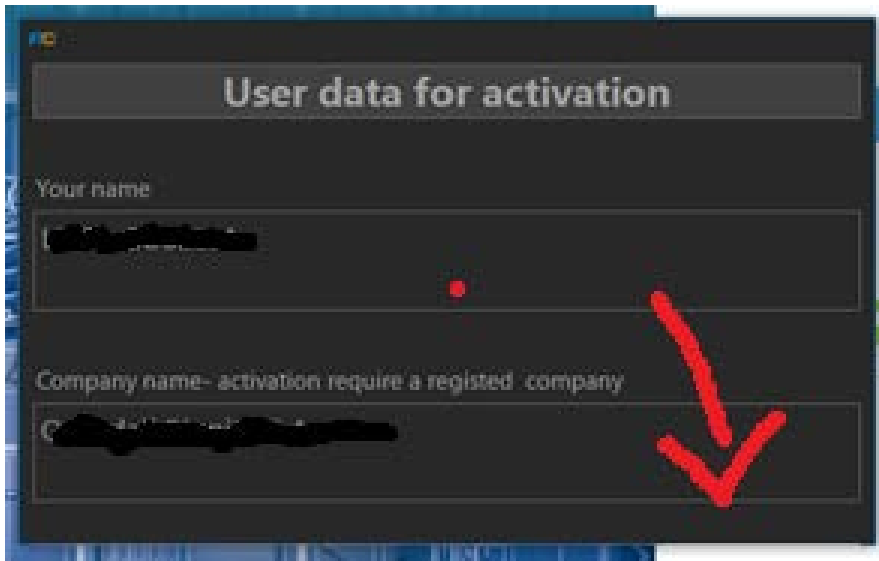

Solution:

1. Stop the antivirus / Anti malware!
2. Close Aircalc if open
3. Go to the folder "C:\configurator\aircalc2"
4. Start the script "AclRegAll.cmd" as PC Administrator: Right-click the CMD file and click "Run as Administrator"

5. Wait for the installation windows to close
6. Open Aircalc

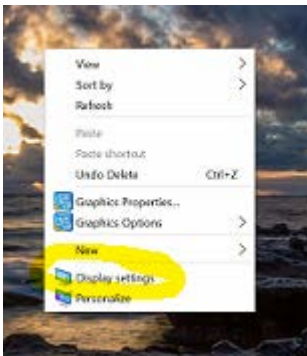

- **Button “OK” on the screen “User data for activation” not visible!**

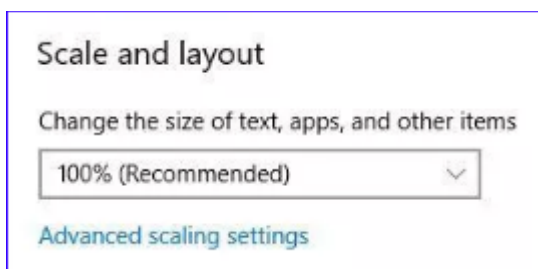

The system font dimension is too high.

Solution:

Right-click in the middle of the desktop and click on “Display setting”

On “Scale and layout, ...” set 100% or the Recommended option

After Aircalc activation, you can reset the value before the operation done .
